

NEWS RELEASE

BERMAD launches its NEW 1000 Series Composite Hydraulic Control Valve for Drinking Water Systems

Corrosion resistant materials, durable construction and light weight make this valve truly different from anything currently on the market. This valve is rated to 230 psi, has NSF 61/372 approval and is available in 2"-4". Many configurations are available, including Pressure Reducing, Pressure Relief, Pressure Sustaining, On/Off Solenoid Control and Level Control.

Applicable in Water Works systems, Water Treatment Plants and Industrial Water Treatment applications.

For more information and availability info please contact Victaulic Bermad Technologies (VBT) at info@vbtech.com or call us at 713-856-1700.
